

DOCUMENTACIÓN

Bibliografía de Revistas

AGUAS RESIDUALES

Nº. 280.—Inhibition kinetics of overall substrate and phenolics removals during the anaerobic digestion of two-phase olive mill effluents (TPOME) in suspended and immobilized cell reactors. Raposo, F., Borja, R., Sanchez, E., Martin, M.A., Martin, A. *Process Biochemistry*, 2003, **39** (4) 425-435.

Nº. 281.—On the origin of cis-vaccenic acid photodegradation products in the marine environment. Rontani, J.F., Koblizek, M., Beker, B., Bonin, P., Kolber, Z.S. *Lipids*, 2003, **38** (10) 1085-1092.

ANÁLISIS

Nº. 282.—Characterisation of polyphenols in green, oolong, and black teas, and in coffee, using cyclic voltammetry. Kilmartin, P.A., Hsu, C.F. *Food Chemistry*, 2003, **82** (4) 501-512.

Nº. 283.—Comparison of seven indicator PCBs and three coplanar PCBs in beef, pork, and chicken fat. Kim, M.K., Kim, S.Y., Yun, S.J., Lee, M.H., Cho, B.H., Park, J.M., Son, S.W., Kim, O.K. *Chemosphere*, 2004, **54** (10) 1533-1538.

Nº. 284.—Sterols of the heterotrophic dinoflagellate, *Pfiesteria piscicida* (Dinophyceae): Is there a lipid biomarker? Leblond, J.D., Chapman, P.J. *Journal of Phycology*, 2004, **40** (1) 104-111.

Nº. 285.—Analysis of headspace volatile and oxidized volatile compounds in DHA-enriched fish oil on accelerated oxidative storage. Lee, H., Kizito, S.A., Weese, S.J., Craig-Schmidt, M.C., Lee, Y., Wei, C.I., An, H. *Journal of Food Science*, 2003, **68** (7) 2169-2177.

Nº. 286.—Identification and characterization of conjugated fatty acid methyl esters of mixed double bond geometry by acetonitrile chemical ionization tandem mass spectrometry. Michaud, A.L., Yurawecz, M.P., Delmonte, P., Corl, B.A., Bauman, D.E., Brenna, J.T. *Analytical Chemistry*, 2003, **75** (18) 4925-4930.

Nº. 287.—Application of headspace - solid phase microextraction and multivariate analysis

for plant oils differentiation. Mildner-Szkudlarz, S., Jelen, H.H., Zawirska-Wojtasiak, R., Wasowicz, E. *Food Chemistry*, 2003, **83** (4) 515-522.

Nº. 288.—Determination of hexane residues in vegetable oils with FTIR spectroscopy. Mirghani, M.E.S., Man, Y.B.C. *Journal of the American Oil Chemists Society*, 2003, **80** (7) 619-623.

Nº. 289.—A new method for determining gossypol in cottonseed oil by FTIR spectroscopy. Mirghani, M.E.S., Man, Y.B.C. *Journal of the American Oil Chemists Society*, 2003, **80** (7) 625-628.

Nº. 290.—A rapid method for the analysis of hydrogenated fats by GC with IR detection. Mjos, S.A., Pettersen, J. *Journal of the American Oil Chemists Society*, 2003, **80** (9) 839-846.

Nº. 291.—Determination of fat content in meat by pulsed nuclear magnetic resonance (P-NMR) technique. Nagy, E., Kormendy, L. *Acta Alimentaria*, 2003, **32** (3) 289-294.

Nº. 292.—Determination of ochratoxin A in virgin olive oils of Greek origin by immunoaffinity column clean-up and high-performance liquid chromatography. Papachristou, A., Markaki, P. *Food Additives and Contaminants*, 2004, **21** (1) 85-92.

Nº. 293.—Effect of ultrasonication and grinding on the determination of lipid class content of microalgae harvested on filters. Pernet, F., Tremblay, R. *Lipids*, 2003, **38** (11) 1191-1195.

BIOTRANSFORMACIONES

Nº. 294.—Production of conjugated linoleic acid by enzyme extract of *Lactobacillus acidophilus* CCRC 14079. Lin, T.Y., Lin, C.W., Wang, Y.J. *Food Chemistry*, 2003, **83** (1) 27-31.

Nº. 295.—A novel hormone-sensitive lipase isoform expressed in pancreatic beta-cells. Lindvall, H., Nevsten, P., Strom, K., Wallenberg, R., Sundler, F., Langin, D., Winzell, M. S.R., Holm, C. *Journal of Biological Chemistry*, 2004, **279** (5) 3828-3836.

Nº. 296.—Microbial degradation products influence colon cancer risk: the butyrate

controversy. Lupton, J.R. *Journal of Nutrition*, 2004, **134** (2) 479-482.

Nº. 297.—Optimising the synthesis of isoamyl butyrate using *Rhizopus* sp lipase with a central composite rotatable design. Macedo, G.A., Pastore, G.M., Rodrigues, M.I. *Process Biochemistry*, 2004, **39** (6) 687-692.

Nº. 298.—Lipase-catalyzed solvent-free transesterification of wood sterols. Martinez, I., Markovits, A., Chamy, R., Markovits, A. *Applied Biochemistry and Biotechnology*, 2004, **112** (1) 55-62.

Nº. 299.—Inactivation kinetics of tomato juice lipoxygenase by pulsed electric fields. Min, S., Min, S.K., Zhang, Q.H. *Journal of Food Science*, 2003, **68** (6) 1995-2001.

Nº. 300.—Production of structured TAG rich in 1,3-capryloyl-2-arachidonoyl glycerol from *Mortierella* single-cell oil. Nagao, T., Kawashima, A., Sumida, M., Watanabe, Y., Akimoto, K., Fukami, H., Sugihara, A., Shimada, Y. *Journal of the American Oil Chemists Society*, 2003, **80** (9) 867-872.

Nº. 301.—Enzyme mechanisms for sterol C-methylations. Nes, W.D. *Phytochemistry*, 2003, **64** (1) 75-95.

Nº. 302.—Immobilization of *Candida rugosa* lipase by sol-gel entrapment and its application in the hydrolysis of soybean oil. Nouredini, H., Gao, X., Joshi, S. *Journal of the American Oil Chemists Society*, 2003, **80** (11) 1077-1083.

Nº. 303.—Acyl-acyl carrier protein (ACP)-thioesterase from developing seeds of *Brassica campestris* cv. B-54 (Agrani). Pathak, M.K., Bhattacharjee, A., Ghosh, D., Ghosh, S. *Plant Science*, 2004, **166** (1) 191-198.

Nº. 304.—Natural estolides produced by *Pseudomonas* sp 42A2 grown on oleic acid: Production and characterization. Pelaez, M., Orellana, C., Marques, A., Busquets, M., Guerrero, A., Manresa, A. *Journal of the American Oil Chemists Society*, 2003, **80** (9) 859-866.

Nº. 305.—Continuous synthesis of lauroyl or oleoyl erythritol by a packed-bed reactor with an immobilized lipase. Piao, J., Takashi, K.A., Adachi, S., Nakanishi, K., Matsuno, R. *Process Biochemistry*, 2004, **39** (6) 681-686.

Nº. 306.—Parameter optimization for the enzymatic hydrolysis of sunflower oil in high-pressure reactors. Primožic, M., Habulin, M., Knez, Z. *Journal of the American Oil Chemists Society*, 2003, **80** (7) 643-646.

COMPOSICIÓN

Nº. 307.—Isoflavonoids from *Dalbergia olivari*. Ito, C., Itoigawa, M., Kanematsu, T., Ruangrunsi, N., Mukainaka, T., Tokuda, H., Nishino, H., Furukawa, H. *Phytochemistry*, 2003, **64** (7) 1265-1268.

Nº. 308.—Alpha and omega of carotenoid cleavage. Lakshman, M.R. *Journal of Nutrition*, 2004, **134** (1) 241S-245S.

Nº. 309.—Seasonal and regional variations of the levels of conjugated linoleic acid in French butters. Ledoux, M., Chardigny, J.M., Darbois, M., Soustre, Y., Sebedio, J.L., Laloux, L. *Sciences des Aliments*, 2003, **23** (3) 443-461.

Nº. 310.—Natural variation for seed oil composition in *Arabidopsis thaliana*. O'Neill, C. M., Gill, S., Hobbs, D., Morgan, C., Bancroft, I. *Phytochemistry*, 2003, **64** (6) 1077-1090.

Nº. 311.—Lipolytic isoenzymes from *Euphorbia latex*. Palocci, C., Soro, S., Cernia, E., Fiorillo, F., Belsito, C.M.A., Monacelli, B., Delle Monache, G., Pasqua, G. *Plant Science*, 2003, **165** (3) 577-582.

Nº. 312.—Effects of methanol extract of *Cirsium japonicum* var. *ussuriense* and its principle, hispidulin-7-O-neohesperidoside on hepatic alcohol-metabolizing enzymes and lipid peroxidation in ethanol-treated rats. Park, J.C., Hur, J.M., Park, J.G., Kim, S. C., Park, J.R., Choi, S.H., Choi, J.W. *Phytotherapy Research*, 2004, **18** (1) 19-24.

NUTRICIÓN

Nº. 313.—Fatty acid profile of egg yolk lipids from hens fed diets rich in n-3 fatty acids. Milinsk, M.C., Murakami, A.E., Gomes, S.T.M., Matsushita, M., de Souza, N.E. *Food Chemistry*, 2003, **83** (2) 287-292.

Nº. 314.—Influence of diets enriched with different vegetable oils on the fatty acid profiles of snail *Helix aspersa maxima*. Milinsk, M.C., Padre, R.D., Hayashi, C., de Souza, N.E., Matsushita, M. *Food Chemistry*, 2003, **82** (4) 553-558.

Nº. 315.—Conjugated linoleic acid (CLA)-enriched milk fat inhibits growth and modulates CLA-responsive biomarkers in MCF-7 and SW480 human cancer cell lines. Miller, A., Stanton, C., Murphy, J., Devery, R. *British Journal of Nutrition*, 2003, **90** (5) 877-885.

Nº. 316.—Sterol-mediated regulation of hormone-sensitive lipase in 3T3-L1 adipocytes. Miura, S., Nagura, H., Sawamura, F., Tomita, I., Kawai, E., Mochizuki, N., Ikeda, M., Kraemer, F.B., Tomita, T. *Lipids*, 2003, **38** (7) 743-750.

Nº. 317.—Impact of unusual fatty acid synthesis on futile cycling through beta-oxidation and on gene expression in transgenic plants(1[w]). Moire, L., Rezzonico, E., Goepfert, S., Poirier, Y. *Plant Physiology*, 2004, **134** (1) 432-442.

Nº. 318.—The influence of the apolipoprotein E gene promoter (-219G/T) polymorphism on

postprandial lipoprotein metabolism in young normolipemic males. Moreno, J.A., Lopez-Miranda, J., Marin, C., Gomez, P., Perez-Martinez, P., Fuentes, F., de la Puebla, R.A.F., Paniagua, J.A., Ordovas, J.M., Perez-Jimenez, F. *Journal of Lipid Research*, 2003, **44** (11) 2059-2064.

Nº. 319.—A diet rich in coconut oil reduces diurnal postprandial variations in circulating tissue plasminogen activator antigen and fasting lipoprotein (a) compared with a diet rich in unsaturated fat in women. Muller, H., Lindman, A.S., Blomfeldt, A., Seljeflot, I., Pedersen, J.I. *Journal of Nutrition*, 2003, **133** (11) 3422-3427.

Nº. 320.—Effects of elderberry juice on fasting and postprandial serum lipids and low-density lipoprotein oxidation in healthy volunteers: a randomized, double-blind, placebo-controlled study. Murkovic, M., Abuja, P.M., Bergmann, A.R., Zirngast, A., Adam, U., Winklhofer-Roob, B.M., Toplak, H. *European Journal of Clinical Nutrition*, 2004, **58** (2) 244-249.

Nº. 321.—Is docosahexaenoic acid (DHA) essential? Lessons from DHA status regulation, our ancient diet, epidemiology and randomized controlled trials. Muskiet, F.A.J., Fokkema, M.R., Schaafsma, A., Boersma, E.R., Crawford, M.A. *Journal of Nutrition*, 2004, **134** (1) 183-186.

Nº. 322.—A plant food-based diet modifies the serum beta-sitosterol concentration in hyperandrogenic postmenopausal women. Muti, P., Awad, A.B., Schunemann, H., Fink, C.S., Hovey, K., Freudenheim, J.L., Wu, Y.W.B., Bellati, C., Pala, V., Berrino, F. *Journal of Nutrition*, 2003, **133** (12) 4252-4255.

Nº. 323.—A fish oil diet does not reverse insulin resistance despite decreased adipose tissue TNF-alpha protein concentration in ApoE-3*Leiden mice. Muurling, M., Mensink, R.P., Pijl, H., Romijn, J.A., Havekes, L.M., Voshol, P.J. *Journal of Nutrition*, 2003, **133** (11) 3350-3355.

Nº. 324.—Sense and nonsense of lipids in artificial nutrition. Naber, A.H.J. *Scandinavian Journal of Gastroenterology*, 2003, **38**, 11-14.

Nº. 325.—Changes in serum concentrations of noncholesterol sterols and lipoproteins in healthy subjects do not depend on the ratio of plant sterols to stanols in the diet. Naumann, E., Plat, J., Mensink, R.P. *Journal of Nutrition*, 2003, **133** (9) 2741-2747.

Nº. 326.—Dietary modification and moderate antioxidant supplementation differentially affect serum carotenoids, antioxidant levels and markers of oxidative stress in older humans. Nelson, J.L., Bernstein, P.S., Schmidt, M.C., Von Tress, M.S., Askew, E.W. *Journal of Nutrition*, 2003, **133** (10) 3117-3123.

Nº. 327.—Interactive effects of dietary palm oil concentration and water temperature on lipid digestibility in rainbow trout, *Oncorhynchus*

mykiss. Ng, W.K., Campbell, P. J., Dick, J.R., Bell, J.G. *Lipids*, 2003, **38** (10) 1031-1038.

Nº. 328.—Beneficial effect of oleoylated lipids on paraoxonase 1: protection against oxidative inactivation and stabilization. Nguyen, S.D., Sok, D.E. *Biochemical Journal*, 2003, **375**, 275-285.

Nº. 329.—Fat adaptation and prolonged exercise performance. Noakes, T. *Journal of Applied Physiology*, 2004, **96** (3) 1243-1243.

Nº. 330.—Egg sphingomyelin lowers the, lymphatic absorption of cholesterol and alpha-tocopherol in rats. Noh, S.K., Koo, S.I. *Journal of Nutrition*, 2003, **133** (11) 3571-3576.

Nº. 331.—A nucleotide insertion in the transcriptional regulatory region of FADS2 gives rise to human fatty acid delta-6-desaturase deficiency. Nwankwo, J.O., Spector, A.A., Domann, F.E. *Journal of Lipid Research*, 2003, **44** (12) 2311-2319.

Nº. 332.—Lipase inhibition attenuates the acute inhibitory effects of oral fat on food intake in healthy subjects. O'Donovan, D., Feinle-Bisset, C., Wishart, J., Horowitz, M. *British Journal of Nutrition*, 2003, **90** (5) 849-852.

Nº. 333.—Apolipoprotein C-III, metabolic syndrome, and risk of coronary artery disease. Olivieri, O., Bassi, A., Stranieri, C., Trabetti, E., Martinelli, N., Pizzolo, F., Girelli, D., Friso, S., Pignatti, P.F., Corrocher, R. *Journal of Lipid Research*, 2003, **44** (12) 2374-2381.

Nº. 334.—Effect of starvation on lipid metabolism and stability of DHA content of lipids in horse mackerel (*Trachurus japonicus*) tissues. Osako, K., Kuwahara, K., Saito, H., Hossain, M.A., Nozaki, Y. *Lipids*, 2003, **38** (12) 1263-1267.

Nº. 335.—Dietary conjugated linoleic acid differentially alters fatty acid composition and increases conjugated linoleic acid content in porcine adipose tissue. Ostrowska, E., Cross, R.F., Muralitharan, M., Bauman, D.E., Dunshea, F.R. *British Journal of Nutrition*, 2003, **90** (5) 915-928.

Nº. 336.—Docosahexaenoic acid affects insulin deficiency- and insulin resistance-induced alterations in cardiac mitochondria. Ovide-Bordeaux, S., Grynberg, A. *American Journal of Physiology-Regulatory Integrative and Comparative Physiology*, 2004, **286** (3) R519-R527.

Nº. 337.—Vegetable oils used as vitamin E vehicle affect the electrical activity of the rat heart. Ozdemir, S., Ayaz, M., Tuncer, T., Ugur, M., Turan, B. *Physiological Research*, 2003, **52** (6) 767-771.

OXIDACIÓN

Nº. 338.—Adsorption isotherms in bleaching hazelnut oil. Bayrak, Y. *Journal of the American Oil Chemists Society*, 2003, **80** (11) 1143-1146.

Nº. 339.—Structure oil-absorption relationships during deep-fat frying. Bouchon, P., Aguilera, J. M., Pyle, D. L. *Journal of Food Science*, 2003, **68** (9) 2711-2716.

Nº. 340.—Ability of chelators to alter the physical location and prooxidant activity of iron in oil-in-water emulsions. Cho, Y. J., Alamed, J., McClements, D. J., Decker, E. A. *Journal of Food Science*, 2003, **68** (6) 1952-1957.

Nº. 341.—Blending of hydrogenated low-erucic acid rapeseed oil, low-erucic acid rapeseed oil, and hydrogenated palm oil or palm oil in the preparation of shortenings. Danthine, S., Deroanne, C. *Journal of the American Oil Chemists Society*, 2003, **80** (11) 1069-1075.

Nº. 342.—Soy protein fortification of a low-fat dairy-based ice cream. Friedeck, K. G., Karagul-Yuceer, Y., Drake, M. A. *Journal of Food Science*, 2003, **68** (9) 2651-2657.

Nº. 343.—Phase behavior of a binary lipid shortening system: From molecules to rheology. Humphrey, K. L., Moquin, P. H. L., Narine, S. S. *Journal of the American Oil Chemists Society*, 2003, **80** (12) 1175-1182.

Nº. 344.—Preparation and properties of lubricant basestocks from epoxidized soybean oil and 2-ethylhexanol. Hwang, H. S., Adhvaryu, A., Erhan, S. Z. *Journal of the American Oil Chemists Society*, 2003, **80** (8) 811-815.

Nº. 345.—Effect of calcium on physicochemical properties of fat-free mozzarella cheese. Joshi, N. S., Muthukumarappan, K., Dave, R. I. *Journal of Food Science*, 2003, **68** (7) 2289-2294.

Nº. 346.—Simulation modeling of the phase behavior of palm oil-supercritical carbon dioxide. Lim, C. S., Manan, Z. A., Sarmidi, M. R. *Journal of the American Oil Chemists Society*, 2003, **80** (11) 1147-1156.

TECNOLOGÍA

Nº. 347.—Thermodynamic properties of the enzymatic hydrolysis of sunflower oil in high-pressure reactors. Primožic, M., Habulin, M., Knez, Z. *Journal of the American Oil Chemists Society*, 2003, **80** (8) 785-788.

Nº. 348.—Thermal degradation of FA and catfish and menhaden oils at different refining

steps. Sathivel, S., Prinyawiwatukul, W., Negulescu, I. I., King, J. M., Basnayake, B. F. A. *Journal of the American Oil Chemists Society*, 2003, **80** (11) 1131-1134.

Nº. 349.—Trans FA in sunflower oil at different steps of refining. Tasan, M., Demirci, M. *Journal of the American Oil Chemists Society*, 2003, **80** (8) 825-828.

Nº. 350.—Pressurized solvent extraction of total lipids in poultry meat. Toschi, T. G., Bendini, A., Ricci, A., Lercker, G. *Food Chemistry*, 2003, **83** (4) 551-555.

TRANSFORMACIONES QUÍMICAS

Nº. 351.—Effects of thermal processing on trans-cis-isomerization of beta-carotene in carrot juices and carotene-containing preparations. Marx, M., Stuparic, M., Schieber, A., Carle, R. *Food Chemistry*, 2003, **83** (4) 609-617.

Nº. 352.—Electrochemical hydrogenation of canola oil using a hydrogen transfer agent. Mondal, K., Lalvani, S. B. *Journal of the American Oil Chemists Society*, 2003, **80** (11) 1135-1141.

Nº. 353.—Changes in commercial virgin olive oil (cv Arbequina) during storage, with special emphasis on the phenolic fraction. Morello, J. R., Motilva, M. J., Tovar, M. J., Romero, M. P. *Food Chemistry*, 2004, **85** (3) 357-364.

Nº. 354.—Changes in chemical composition of pumpkin seeds during the roasting process for production of pumpkin seed oil (Part 1: non-volatile compounds). Murkovic, M., Piironen, V., Lampi, A. M., Kraushofer, T., Sontag, G. *Food Chemistry*, 2004, **84** (3) 359-365.

Nº. 355.—Oxidative conversion of carotenoids to retinoids and other products. Nagao, A. *Journal of Nutrition*, 2004, **134** (1) 237S-240S.

Nº. 356.—Effect of gamma-tocopherol on formation of nonvolatile lipid degradation products during frying of potato chips in triolein. Neff, W. E., Warner, K., Eller, F. *Journal of the American Oil Chemists Society*, 2003, **80** (8) 801-806.

Nº. 357.—A novel lipid hydroperoxide-derived modification to arginine. Oe, T., Lee, S. H., Elipe, M. V. S., Arison, B. H., Blair, I. A. *Chemical Research in Toxicology*, 2003, **16** (12) 1598-1605.
